## Citations and explanations (Rule 70.7)

The following documents have been cited in the Search Report:

D1: JP 56 005292 A  
D2: JP 02 106487 A  
D3: JP 04 185592 A  
D4: US 3799100 A

The D1 describes a joining method for a floating box body on the sea. A concave fitting device of one floating box body is fitted in a convex fitting part of another floating box body. They are connected by strained wire passed through holes in the conical parts.

The D2 discloses a floating construction attaching a number of pontoon type box body units by joint means and shearing keys.

In the D3 a floating body connecting structure is described, consisting of an elastic member between a pair of mounting steel brackets to absorb oscillation of the floating body.

The D4 shows a coupling apparatus for two vessels formed by two or more resilient posts.

As the details of the connections in the documents cited are different from the details in the application subject, none of the documents anticipates neither novelty nor inventive step of the application subject.

Industrial applicability is given.
